

Be a Ladybug Girl with Lulu!

Instructions:

1. Photocopy or trace the outline of the wings onto thick, 11 x 17 paper. Make 2 wings (or 4 for double-sided wings) per child.
2. Cut out the wings and punch holes where shown. Line up the tips of the wings so that hole number 1 is overlapping. Using a small piece of string, tie the two wings together through hole 1. Cut and measure 2 one-foot lengths of string. Thread one string through hole 2 from back to front and through hole 3 from front to back and tie ends in a bow, making a strap. Repeat on other wing. Slip child's arms through loops and tighten string as necessary. (See Diagram 1)
3. Provide each child with crayons or markers (be sure to have plenty of red and black!) so they can decorate their wings.
4. Using 4 pipe-cleaners, help each child create antennae to go with their wings. Make a circle with two pipe-cleaners attached to each other on either end. Then, connect one standing straight up on either side of the circle. Curl the top of each vertical pipe-cleaner. (See Diagram 2)
