

I THINK I WANT TO ANIMATE MY COLLAGES FIRST.

I USUALLY CUT OUT PICTURES FROM MAGAZINES AND ADS AND GLUE THEM ONTO PAPER.

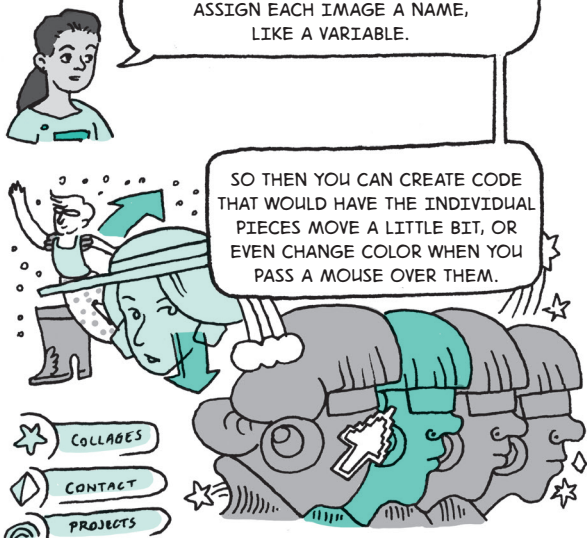

THAT SOUNDS LIKE FUN. BUT HOW DO WE TURN THAT INTO CODE?

AND THEN ISOLATE THE INDIVIDUAL PIECES USING PHOTOSHOP.

SO THEN YOU CAN CREATE CODE THAT WOULD HAVE THE INDIVIDUAL PIECES MOVE A LITTLE BIT, OR EVEN CHANGE COLOR WHEN YOU PASS A MOUSE OVER THEM.

THAT COULD WORK! I THINK WE COULD CODE THAT WITH PROCESSING OR ON A WEBSITE WITH JAVASCRIPT.
