

I THINK I WANT TO ANIMATE MY COLLAGES FIRST.

WELL, HOW DO YOU MAKE THEM?

I USUALLY CUT OUT PICTURES FROM MAGAZINES AND ADS AND GLUE THEM ONTO PAPER.

SOMETIMES I ADD MY OWN COLORED SHAPES OR DRAW ON THEM.

THAT SOUNDS LIKE FUN. BUT HOW DO WE TURN THAT INTO CODE?

YOU COULD SCAN ONE OF THE FINISHED COLLAGES

AND THEN ISOLATE THE INDIVIDUAL PIECES USING PHOTOSHOP.

YEAH, AND THEN YOU COULD ASSIGN EACH IMAGE A NAME, LIKE A VARIABLE.

SO THEN YOU CAN CREATE CODE THAT WOULD HAVE THE INDIVIDUAL PIECES MOVE A LITTLE BIT, OR EVEN CHANGE COLOR WHEN YOU PASS A MOUSE OVER THEM.

THAT COULD WORK! I THINK WE COULD CODE THAT WITH PROCESSING OR ON A WEBSITE WITH JAVASCRIPT.
