

Write Stuff or Write-Off?

Having investigated your handedness and your writing style, let's put the two together and investigate your handwriting. Both psychologists and employers have long used graphology—the scientific analysis of handwriting—as a handy (sorry!) way of measuring personality and potential.

So, let's try it. Copy the following passage into the box below:*

The quick brown fox jumps over a lazy dog. Xylophone wizard begets quick jive form. Fred specialized in the job of making very quaint wax toys.

* This passage contains three *pangrams*—sentences that contain every letter of the alphabet.
